

# SAVI Training Manual

## Introduction & Set Up

# Getting Started

## What Do You Need To Know?

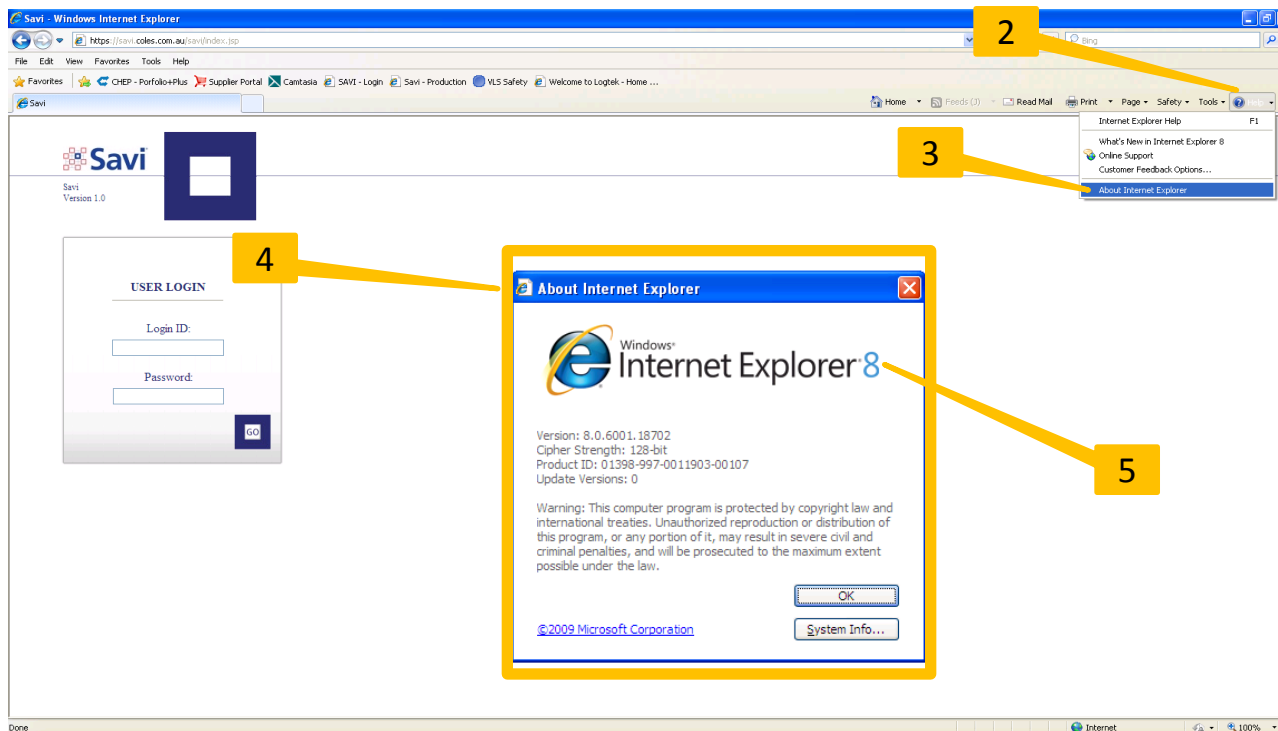

You will be required to use Internet Explorer version 7 or 8

MAC users can access SAVI via the Safari browser providing they have installed Adobe™ Flash version 11.5

The new version of SAVI does require Adobe™ Flash version 11.5 to operate  
*Adobe flash is very common and supports all previous versions of flash and therefore is less constrictive for other applications – so no more problems with Java*

# Getting Started

Lets check your version of Internet Explorer

1. Open your internet explorer
2. Click on the Help button
3. Select About Internet Explorer
4. A new information box will appear in the middle of the screen
5. The current version of internet explorer will be displayed in the box
6. If you using Internet Explorer version 6 you will need to update to version 7 or 8

# Getting Started

Where to find Internet Explorer version 8

You can download it from the Microsoft™ website, here is the link –

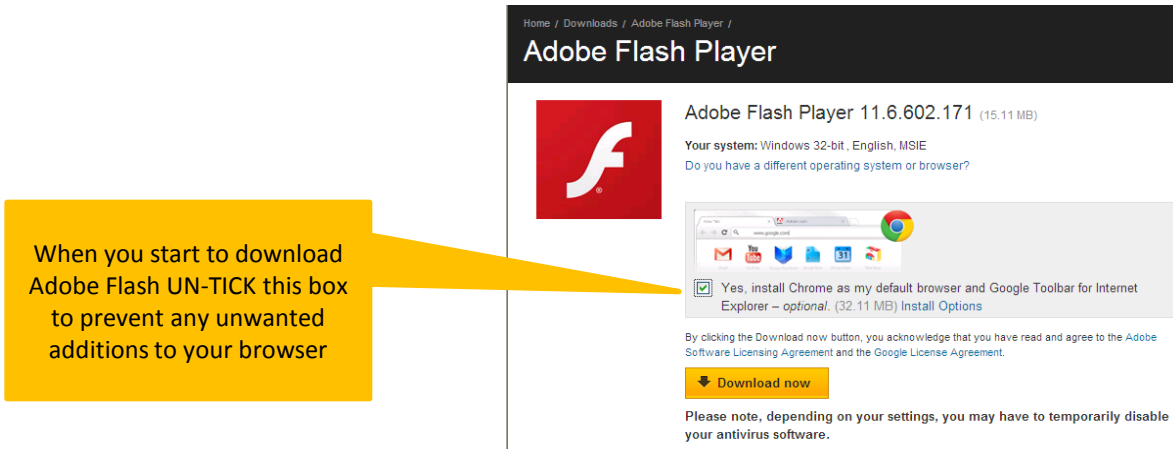

[Download Internet Explorer 8 - Microsoft Windows](#)

# Getting Started

Lets check if you have Flash player installed, and if do you have flash installed we can check if it needs updating or not

The easiest way to check this is to try and download the current version of Adobe™ Flash. Below is the link

<http://get.adobe.com/flashplayer/>

The screenshot shows the Adobe Flash Player download page. At the top, it says "Home / Downloads / Adobe Flash Player / Adobe Flash Player". Below this is the Adobe Flash logo and the text "Adobe Flash Player 11.6.602.171 (15.11 MB)". It also displays "Your system: Windows 32-bit, English, MSIE" and a question "Do you have a different operating system or browser?". A callout box points to a checkbox option: "Yes, install Chrome as my default browser and Google Toolbar for Internet Explorer – optional. (32.11 MB) Install Options". Below this is a "Download now" button and a note: "Please note, depending on your settings, you may have to temporarily disable your antivirus software."

When you start to download Adobe Flash UN-TICK this box to prevent any unwanted additions to your browser

# Getting Started

The Flash Player will automatically install even if you are currently using the latest version

Your PC should now be ready to use the new SAVI system

# Getting Started

Below is the link to the SAVI system, click on the link and then be sure to add it to your favourites
